

ASSIGNMENT – 2

INVENTORY MANAGEMENT SYSTEM FOR RETAILERS

Assignment Date	25.10.2022
Student Name	Sivasankar M
Student Roll No	820319104040
Max Mark	02

Question:

1. Create a Flask App
2. Add the Home page, About page
3. Add the Bootstrap
4. Add the Sign in page and App the Signup Page + (add database)

Home page:

The screenshot shows a web application interface with a dark gray background. At the top, there is a navigation bar with links for 'HOME', 'ABOUT', and 'CONTACT'. To the right of the navigation bar is a search bar with the placeholder text 'Type To text' and a 'Search' button. The main content area features a large heading 'Inventory Management For Retailers' in a light blue font. Below the heading, there is a paragraph of text: 'Inventory Management refers to the process of ordering storing,using and selling a company's inventory. This includes the management of raw materials,components,and finished products as well as warehousing and processing of such items'. Below this text is a 'JOIN US' button. On the right side of the page, there is a 'Create Account' form with fields for 'Username', 'Email Address', 'Password', and 'Confirm password'. Below these fields is a 'Continue' button and a link that says 'Already have an account? Sign in'.

About:

About Us Page

Some text about who we are and what we do.

Retail inventory management is the process of ensuring you carry merchandise that shoppers want, with neither too little nor too much on hand. By managing inventory, retailers meet customer demand without running out of stock or carrying excess supply. In practice, effective retail inventory management results in lower costs and a better understanding of sales patterns.

Retail inventory management tools and methods give retailers more information on which to run their businesses. Applications have been developed to help retailers track and manage stocks related to their own products. The System will ask retailers to create their accounts by providing essential details. Retailers can access their accounts by logging into the application.

Once retailers successfully log in to the application they can update their inventory details, also users will be able to add new stock by submitting essential details related to the stock. They can view details of the current inventory. The System will automatically send an email alert to the retailers if there is no stock found in their accounts. So that they can order new stock.
